DETAILED ACTION

Claims 14-26 are pending in the application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 14-26, drawn to compounds, compositions and method of use of the compounds of formula 1 where W is 1,4,8-triazabicyclo[4,4,0]decane (as shown by the second formula).

Group II, claim(s) 14-26, drawn to compounds, compositions and method of use of the compounds of formula 1 where W is piperazine (as shown by the first formula when n is 2 and X is -CHY¹-CHY²-).

Group III, claim(s) 14-26, drawn to compounds, compositions and method of use of the compounds of formula 1 where W is diazepine (as shown by the first formula when n is 3 and X is -CHY¹-CHY²- or n is 2 and X is -CH₂-CHY³-CH₂-).

Group IV, claim(s) 14-26, drawn to compounds, compositions and method of use of the compounds of formula 1 where W is diazocine (as shown by the first formula when n is 3 and X is -CH₂-CHY³-CH₂-).

Art Unit: 1624

Group V, claim(s) 14-26, drawn to compounds, compositions and method of use of the compounds of formula 1 where W is quinoxaline optionally containing an additional nitrogen atom in the benzene ring (as shown by the first formula when n is 2 and X is phenyl or pyridyl).

Group VI, claim(s) 14-26, drawn to compounds, compositions and method of use of the compounds of formula 1 where W is benzodiazepine optionally containing an additional nitrogen atom in the benzene ring.

Group VII, claim(s) 14-26, drawn to compounds, compositions and method of use of the compounds of formula 1 where W is benzodiazocine optionally containing an additional nitrogen atom in the benzene ring.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the variable core created by varying definitions of W in formula 1 do not belong to a recognized class of chemical compounds in the art, and a reference anticipating one invention, would not render obvious the other. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Art Unit: 1624

named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
